# SECURITY POLICY MANAGEMENT

Connecting Security to Business Agility

# WHAT AUTOMATED NETWORK SECURITY POLICY MANAGEMENT DOES FOR YOU.

## CONCERNS

Today, data centers and enterprise networks are more sophisticated and more complex than ever before, with a vast number of security devices, such as firewalls, routers, switches, secure web gateways and more. The rules on these devices must be managed across multiple vendors, devices, operations teams and geographies.

## CHALLENGES

**As Security Manager, you have to:**

- Ensure faster service delivery
- Automate security change management
- Ensure continuous compliance
- Reduce risk in policies and misconfigured devices
- Optimise firewall operations
- Simplify migrations to virtual data centers

## SOLUTION

Automating network security policy management allows to bridge traditional gaps between security, network and application teams by delivering an automated and application-centric solution for managing complex policies across firewalls, routers, switches, secure web gateways and more, to:

- Streamline security operations and change management
- Ensure continuous compliance
- Accelerate application delivery and ensure service availability
- Understand risk from the business perspective
- Deliver tighter security policy that offers better protection against cyber-attacks
- Classify & encrypt ALL file formats in a consistent manner

## AUTOMATED NETWORK SECURITY POLICY MANAGEMENT:

### Data center application connectivity management

- Discover, map and maintain application connectivity
- Safely remove access for decommissioned applications
- Translate business requirements to underlying policy

### Security policy change automation

- Process security changes 2-4x faster
- Improve accuracy and accountability
- Ensure continuous compliance and security

### Security policy analysis and audit

- Automate firewall, router and web proxy operations
- Ensure a secure and optimised policy
- Conduct audits in hours instead of weeks

## TANGIBLE BENEFITS

Manage security at the speed of business and increase:

- Agility
- Adaptability
- Alignment
- Assurance

# AUTOMATED NETWORK SECURITY POLICY MANAGEMENT

The AlgoSec Suite is comprised of three stand-alone, yet integrated products:

- **BusinessFlow** - delivers application-centric security policy management that ensures faster service delivery and maximises application availability.
- **FireFlow** - intelligently automates the security policy change workflow, enabling 2-4x faster change processing, increasing accuracy and accountability, enforcing continuous compliance and mitigating risk.
- **Firewall Analyzer** - provides visibility and control of complex security policies across multiple vendors and devices to automate firewall operations and ensure proper configuration of network security devices.

## WHY OUR CUSTOMERS WORK WITH US

Trasys International offers a unique blend of IT Security Solutions to assist CIOs in protecting critical information, aligning security with business processes, managing identities and access and protecting critical infrastructure from cyber-attacks.

AlgoSec empowers organisations to manage security at the speed of business. Through its application-centric approach, AlgoSec automates and simplifies security policy management across virtual, cloud and physical environments to accelerate application delivery while ensuring security.
